# QR code yoki Bar code

Bugungi kunda butun dunyoda elektron to'lovlarni amalga oshirishda ham mazkur texnologiyadan faol ravishda foydalanilmoqda.

Har bir mahsulotning maxsus bar code yoki QR code mavjud va endilkda ulardan tog'ri foydalanish kerak.

QR kod qo'llanishining asosiy tamoyili shundaki, u giperhavola tarzida ishlay oladi. Bu birdaniga ko'p ma'lumot haqida xabar berish zarur bo'lgan holatlarda yoki uni soddalashtirish kerak bo'lganda juda qulay vosita sanaladi. QR kod electron ma'lumotlar uzatish prinsipiga asoslanadi. Bu, ayniqsa, ko'p miqdordagi axborotni uzatish yoki undan foydalanishni soddalashtirishda qo'l keladi.
